

Séminaire Etudiant autour de l'Optique

Lundi 18 Mai 2015 14 H

Salle de Conférences du CEMES

14h - Tian Wang

Study of terra sigillata: the yellow pigment of marbled sigillata

14h20 - Peter Wiecha

Sub-ps time resolved nonlinear microscopy

14h40 - Upkar Kumar

Optical Properties of Colloidal Plasmonic Nanostructures

15h - PAUSE CAFE

15h20 - Chloé Bayon

Cholesteric microlenses and micromirrors

15h40 - Ines Abid

Hybrid plasmonics

16h - Damien Tristant

Optical signature of bulk and solution of KC8 and KC24 and Raman thermometer applied to double-walled carbon nanotube fibers

16h30 FIN DU SEMINAIRE
